

# Enabling interaction: A study of examiner behaviour in an interactive speaking test

A mixed methods study of the Trinity GESE Interactive Task

Richard Harris, Trinity College London

# Graded Examinations in Spoken English (GESE)

- One examiner, one candidate
- GESE Grades 7 and 8 – CEFR B2
- Three tasks
  - Topic Discussion
  - Interactive Task
  - Conversation
- Interactive task generates candidate-led interaction

# Purpose of the study

- To investigate what strategies are used by examiners in the GESE Interactive Task
- To investigate whether the strategies found have an effect on objective measures of candidate performance

# Corpus transcripts

- Complete transcriptions of Interactive Tasks extracted from the corpus
- Examined linguistic and para-linguistic behaviour of both examiners and candidates
- 54 transcripts
- 37 Interactive Prompts
- 10 nationalities

# Methodology

- Examiners
  - Grounded theory developed a taxonomy of strategies that examiners use to allow candidates to take the lead in interaction
  - Identified 8 strategies
- Candidates
  - Quantitative analysis of the candidates' responses to the different strategies
  - Fluency
  - Lexis
  - Grammar

# Examiner strategies

- ACCEPTING
- HOLDING
- INAUTHENTICITY
- PARSIMONY
- REFORMULATING
- REJECTING
- RESOLVING
- STEERING

# Examiner strategies

- ACCEPTING
  - HOLDING
  - INAUTHENTICITY
  - PARSIMONY
  - REFORMULATING
  - REJECTING
  - RESOLVING
  - STEERING
- Behaviour such as
    - Clarifying
    - Confirming
    - Repeating
    - Restating the original dilemma

# Example - REFORMULATING

*My nephew wants to work in the music business when he leaves school, but his parents think he should go to university. I'm not sure I agree with them.*

<S> and er if he er can find a good job to to go to live to live to have a good life why not? </u>

<E> but he </u>

<S> do you agree? </u>

<E> he doesn't want to go to university he wants to leave school at sixteen </u>

# Examiner strategies

- ACCEPTING
- HOLDING
- INAUTHENTICITY
- PARSIMONY
- REFORMULATING
- REJECTING
- RESOLVING
- STEERING

# Examiner strategies

- ACCEPTING
  - HOLDING
  - INAUTHENTICITY
  - PARSIMONY
  - REFORMULATING
  - REJECTING
  - RESOLVING
  - STEERING
- A neutral response that maintains the dialogue but doesn't appear to make demands upon its direction
  - May include information intended to add grist to the mill of the candidate's questioning

# Examiner strategies

- ACCEPTING
  - HOLDING
  - INAUTHENTICITY
  - PARSIMONY
  - REFORMULATING
  - REJECTING
  - RESOLVING
  - STEERING
- Overtly asking for solutions
  - Overtly or more subtly steering a candidate towards an outcome apparently preferred by the examiner
  - Proffering own solutions
  - Raising the stakes
  - Pseudo-passivity

# Example – HOLDING

*My teenage nephew has decided that he wants to take up boxing as a way to get fit. I'm not sure it's such a great idea.*

<E> I I don't know really I think erm perhaps he's got some new friends who are older than him and and they are really into boxing  
</u>

<S> mm </u>

<E> and so maybe it's because of his friends you know </u>

<S> mm </u>

<E> and they're they're not nice boys they're bad boys you know </u>

# Example – HOLDING

*My teenage nephew has decided that he wants to take up boxing as a way to get fit. I'm not sure it's such a great idea.*

<E> I I don't know really I think erm perhaps he's got some new friends who are older than him and and they are really into boxing  
</u>

<S> mm </u>

<E> and so maybe it's because of his friends you know </u>

<S> mm </u>

<E> and they're they're not nice boys they're bad boys you know </u>

# Example – STEERING

*My teenage nephew has decided that he wants to take up boxing as a way to get fit. I'm not sure it's such a great idea.*

*<E> I I don't know really I think erm perhaps he's got some new friends who are older than him and and they are really into boxing  
</u>*

*<S> mm </u>*

*<E> and so maybe it's because of his friends you know </u>*

*<S> mm </u>*

*<E> and they're they're not nice boys they're bad boys you know </u>*

# Examiner strategies

- ACCEPTING
- HOLDING
- INAUTHENTICITY
- PARSIMONY
- REFORMULATING
- REJECTING
- RESOLVING
- STEERING

# Examiner strategies

- ACCEPTING
  - HOLDING
  - INAUTHENTICITY
  - PARSIMONY
  - REFORMULATING
  - REJECTING
  - RESOLVING
  - STEERING
- Giving limited information in response to a request (in an apparently unforthcoming way)
  - Giving a minimal response to prompt the candidate to contribute / question more

# Example - PARSIMONY

*My nephew used to dress very well, but now he's totally changed his appearance and I'm not sure now what to think about it.*

<S> yes so er nowa= he has just changed or want to change </u>

<E> no he has changed </u>

<S> has changed </u>

<E> totally changed </u>

<S> totally changed </u>

<E> yeah his appearance yes </u>

<S> okay well it's a pity </u>

<E> mm </u>

<S> no </u>

<E> mm </u>

# What follows the strategy? Performance

- Extracted all candidate responses that followed the strategies
- Across 8 strategies, 886 examples of performance
- Created three responses
  - Original response (backchannels removed)
  - Response with pauses removed
  - Pruned response (after Iwashita, Brown, McNamara & O'Hagan, 2008)

# What follows the strategy? Performance

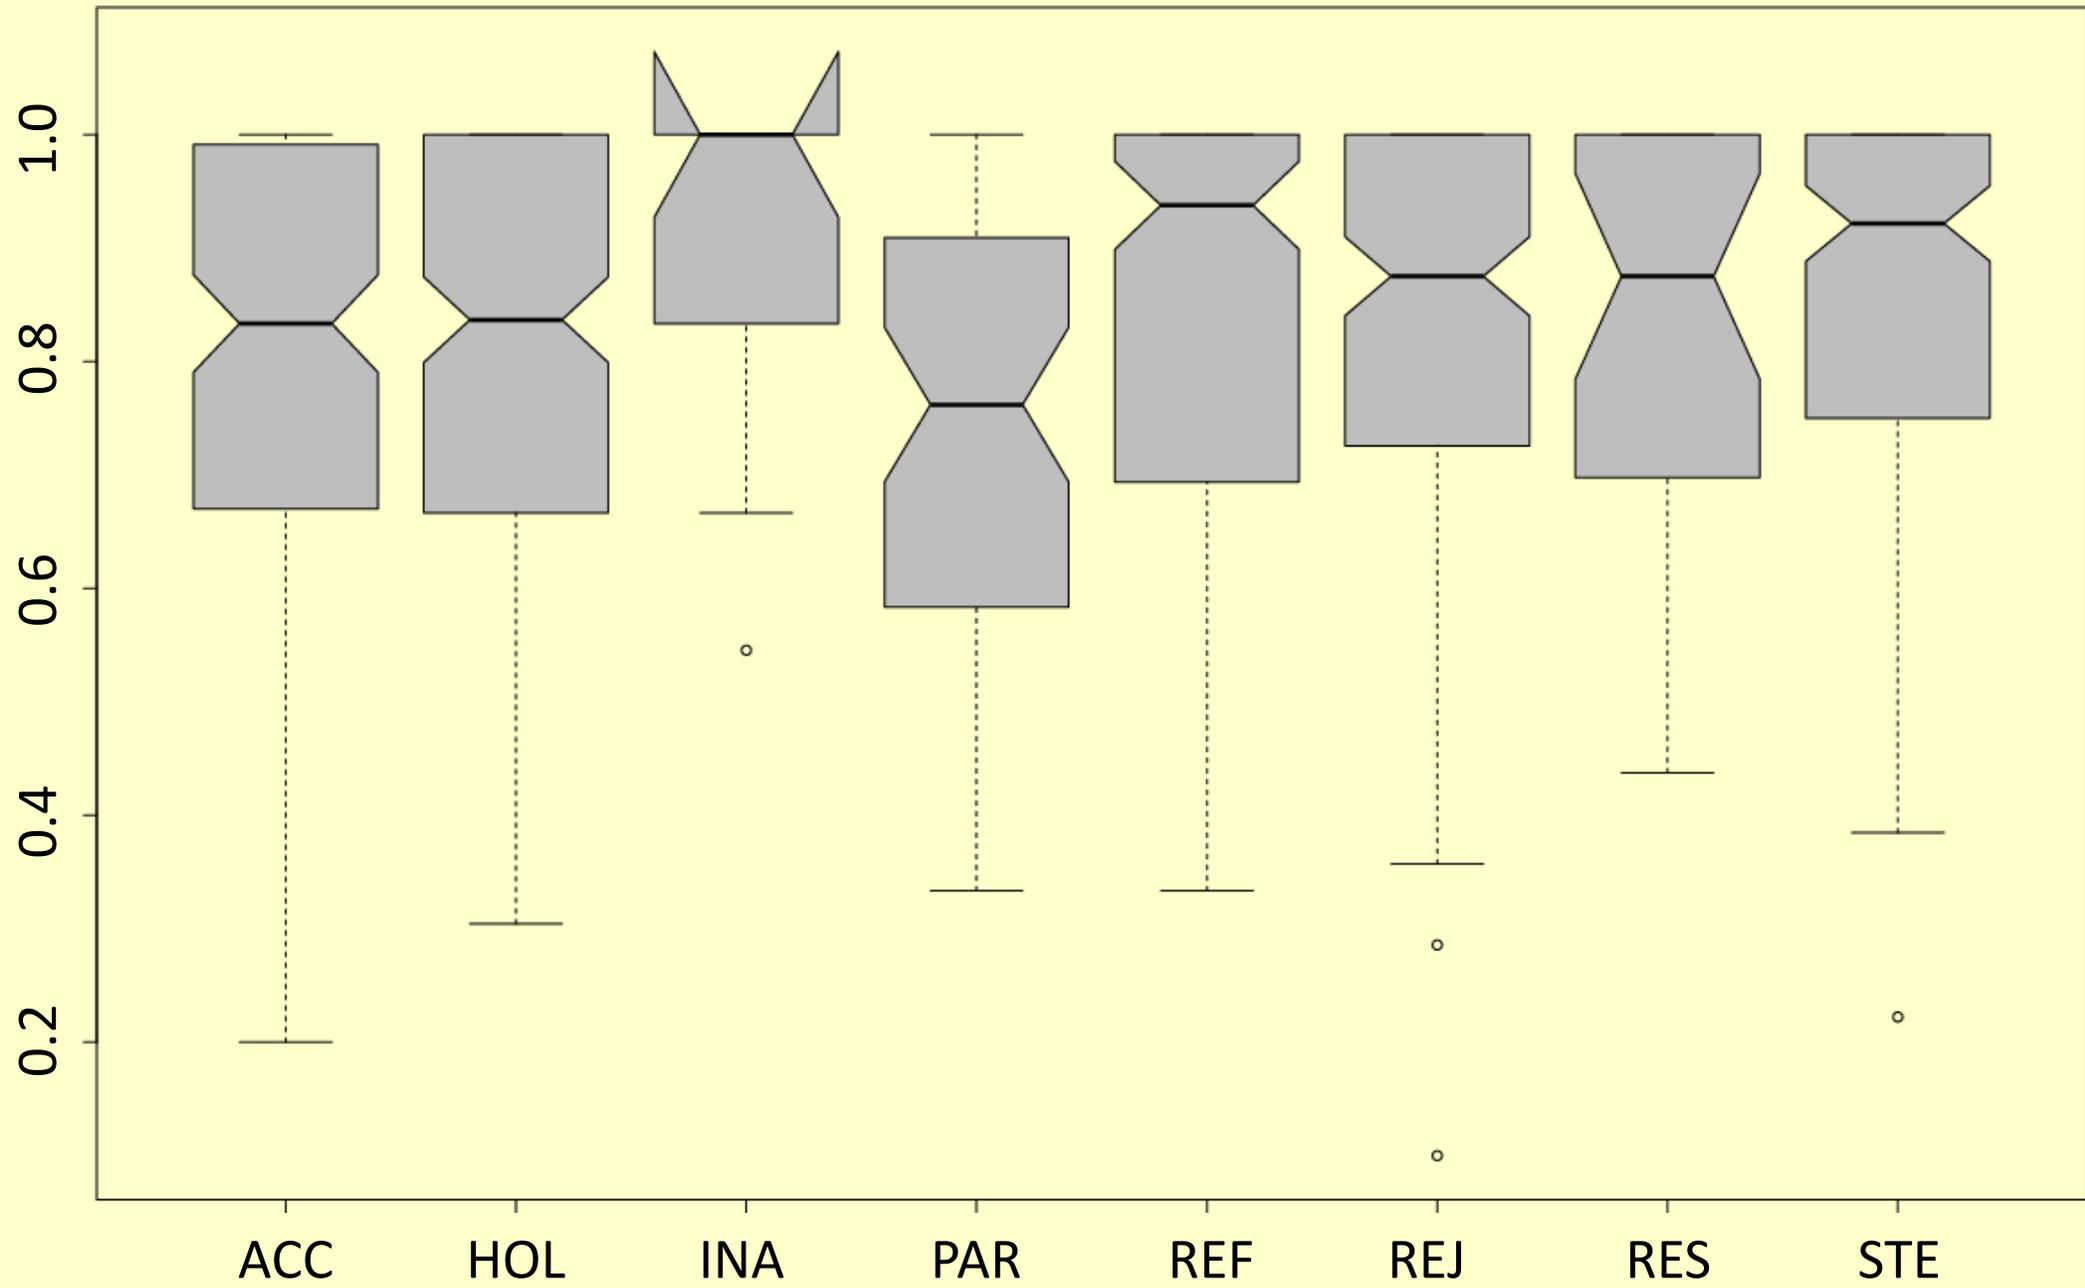

- Fluency
  - Length of response
  - Reformulation ratio
  - Pause ratio
- Lexis
  - TTR
  - COCA Range
  - COCA Frequency
- Grammar
  - Grammar errors
  - Complex t-unit ratio
  - Complex nominals per t-unit

(after Iwashita et al., 2008)

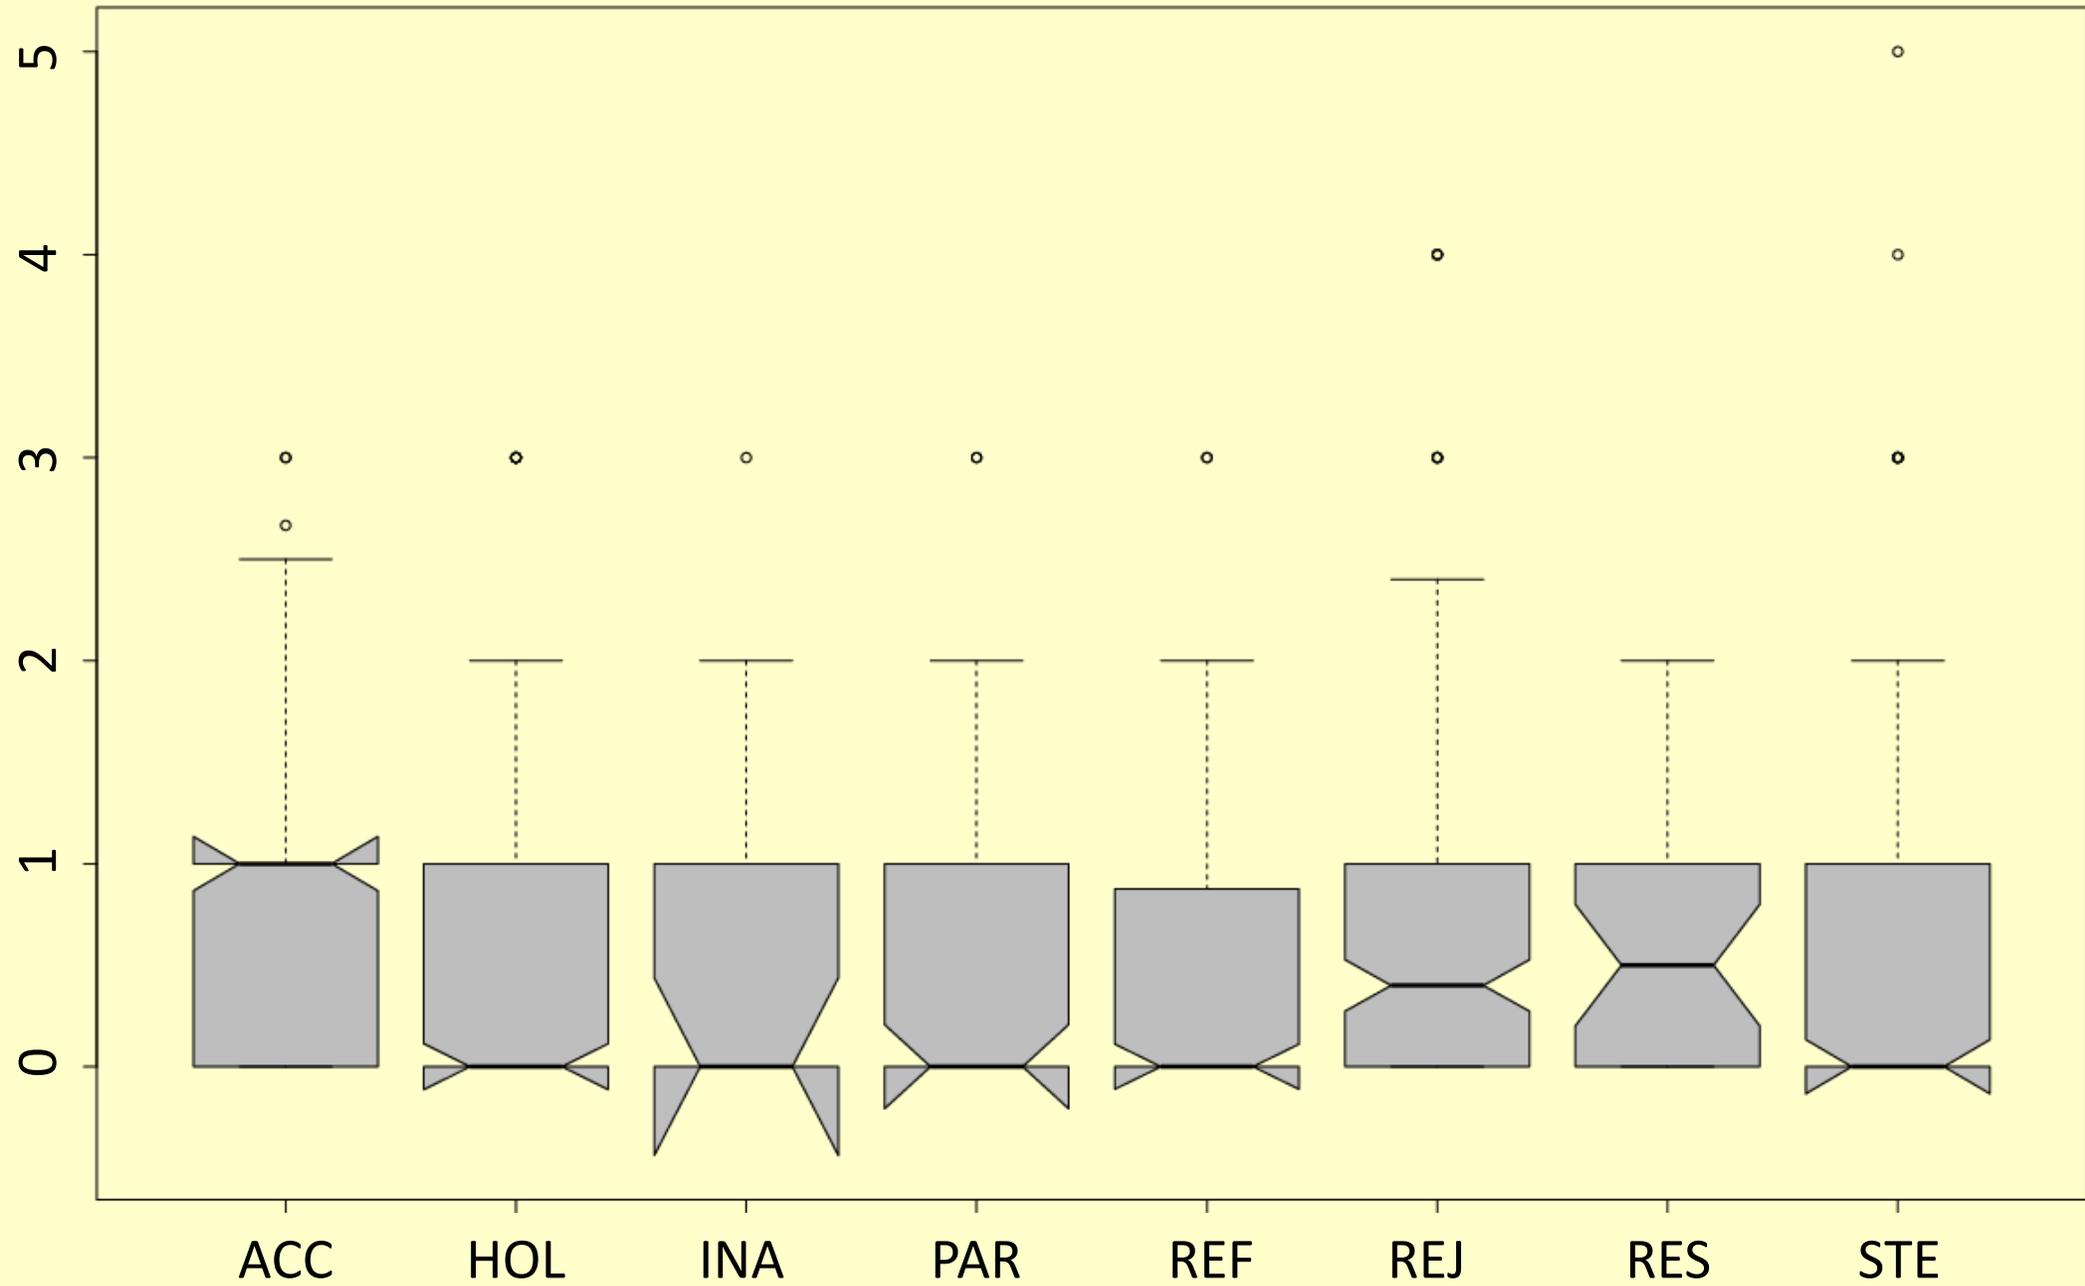

The logo for SiNLP is a rounded rectangular button with a gradient from light brown to dark brown. The text "SiNLP" is written in white, bold, sans-serif font.The logo for TAASSC is a blue rounded rectangular button with a slight shadow. The text "TAASSC" is written in orange, bold, sans-serif font.The logo for GAMET is a purple rounded rectangular button with a slight shadow. The text "GAMET" is written in orange, bold, sans-serif font.The logo for TAALES is a green rounded rectangular button with a slight shadow. The text "TAALES" is written in grey, bold, sans-serif font.

# Discussion

- HOLDING, PARSIMONY and STEERING elicit **less fluent responses** than REFORMULATING.
  - The goal of reformulating is to remove uncertainty
  - Holding increases cognitive load
  - Parsimony introduces uncertainty in an interactional context
  - Steering may introduce tension

# Discussion

- ACCEPTING, REJECTING and STEERING elicit **responses of greater grammatical complexity** than REFORMULATING and PARSIMONY (as measured by complex nominals per t-unit).
  - Accepting, rejecting and steering generate the need for justification, questioning, or elaboration on the part of the candidate.
  - Parsimony is intended to leave space for candidates' contributions.
  - Space is not what is expected in an interactional context.

# Summary

- Grounded theory to explore spoken interaction
- Empirical quantitative analysis of candidate performance
- Examiner behaviour has an effect on candidate performance
- Improved understanding of the scope of the effect in an interactional context
- “The world cannot be understood without numbers, and it cannot be understood with numbers alone. Love numbers for what they tell you about real lives.” – Hans Rosling
