# Introduction

## Generative AI and Education

All spheres of education are currently finding their feet when it comes to the continuing explosion of GenAI.

As teacher trainers, are we really well-placed to determine the direction of travel on this at present?  
How are we to prepare pre-service teachers for the unknown challenges of the future?

Large language models (LLMs) per se are **NOT** a new phenomenon.

English as a Medium of Instruction (EMI) contexts have long been acquainted with a far less mediatic predecessor: **machine translation** (Groves and Mundt, 2021).

# Objectives

**The objectives and central themes of today's session are:**

- 1 GenAI Apps for Teacher Education Pedagogical Enhancement**
- 2 Getting to Grips with Prompt Engineering**
- 3 Dipping a Toe into the GenAI Waters beyond ChatGPT**
- 4 Wider Issues and Concerns**

## GenAI and English Language Instruction

Sharagah and Sa'di (2022) offer an insightful systematic review of studies published between 2015 and 2021 that address the implications of AI for English language teaching and learning.

Yeo (2023) and Johinke (2023) underline GenAI-induced concerns regarding authorship and academic integrity in L2 writing instruction.

## GenAI and Pedagogy

The implications of this phenomenon are different for each target domain, which means generic guidelines may not take into account the specific future needs in the differing pedagogical settings of our pre-service tutors.

Substantial GenAI developments far outpace our ability to document and gauge expert consensus.

Back to the drawing board on many counts (Bannister et al., forthcoming).

## GenAI and Student Learning

Documented student concerns in different settings as to educator knowledge, skillset, and ability to fully prepare them effectively for the GenAI - dominated world of tomorrow (or today?) (Banihashem et al., 2023).

A smoking gun in students hands?

GenAI as 'learning assistant' as opposed to educator replacement (Chen et. al, 2023; Odden et al., 2023).

# ChatGPT and Other Fantastic Beasts for English Language Teaching

The field of English Language Teaching (ELT) has witnessed remarkable advancements in recent years, driven by technological innovations and the integration of artificial intelligence (AI) tools.

Among the many AI applications that have emerged, ChatGPT stands out as a powerful language model that can significantly enhance the teaching and learning experience.

# Are there any other tools?

There are many more tools apart from ChatGPT,  
do you know them all?

**Materials  
Development**

**Classroom  
Practice**

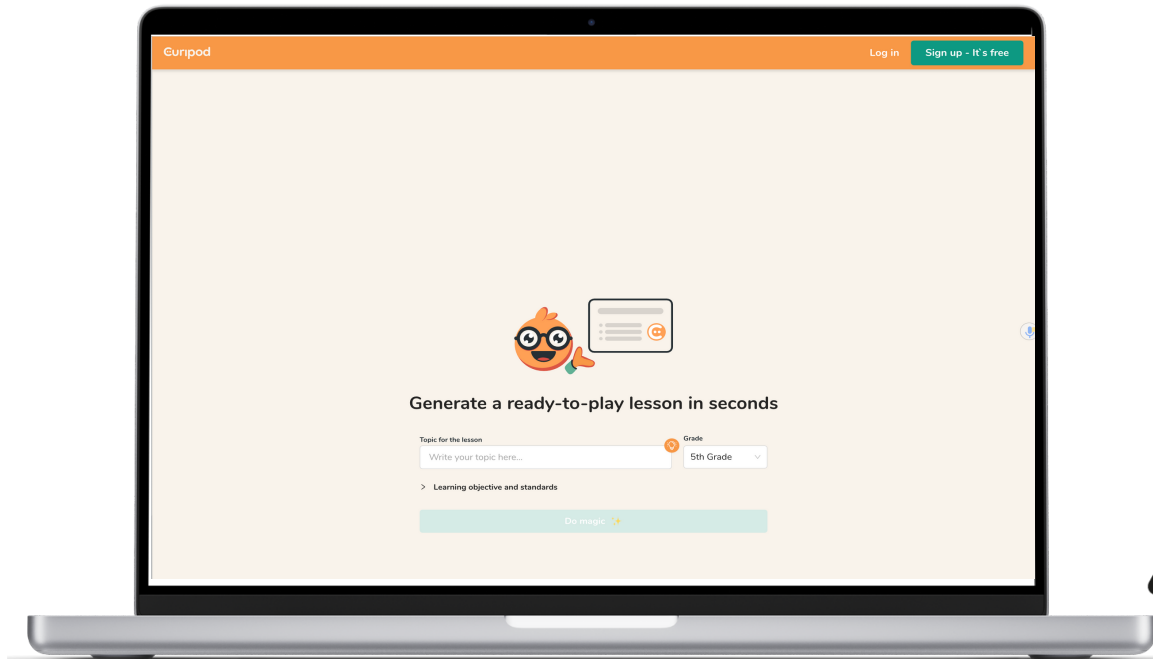

**Assessment**

# Materials Development

## 1 CURIPOD

- Lesson plans in seconds
- Introduce the topic, grade, learning objectives and standards

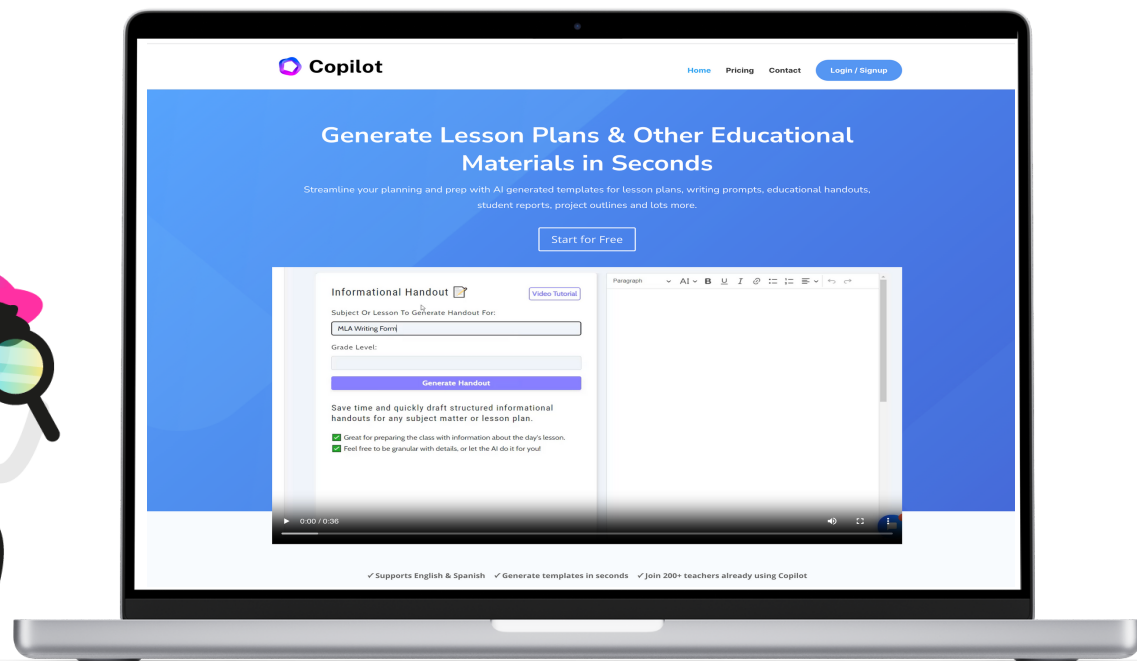

# Materials Development

## 2 COPILOT

- Education Copilot is an AI-driven platform designed to streamline lesson planning and material creation for educators.
- AI lesson planner, educational handouts, supports English and Spanish,...

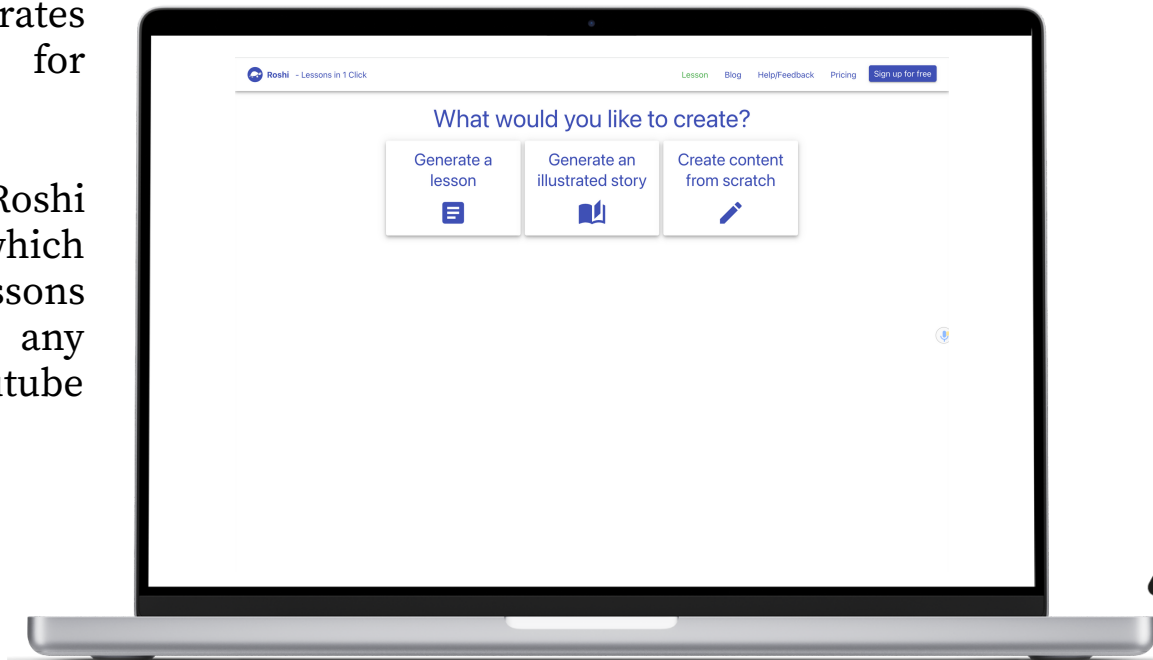

# Materials Development

## 3 ROSHI

- Roshi AI is an online platform that helps teachers create learning materials from online content, simplifies text, generates questions, and saves time for educators at all levels.
- One of the key features of Roshi AI is "Lessons in 1 Click" which allows teachers to create lessons with a single click, using any online content such as Youtube videos or articles

# Are there any other tools?

There are many more tools apart from ChatGPT,  
do you know them all?

**Materials  
Development**

**Classroom  
Practice**

**Assessment**

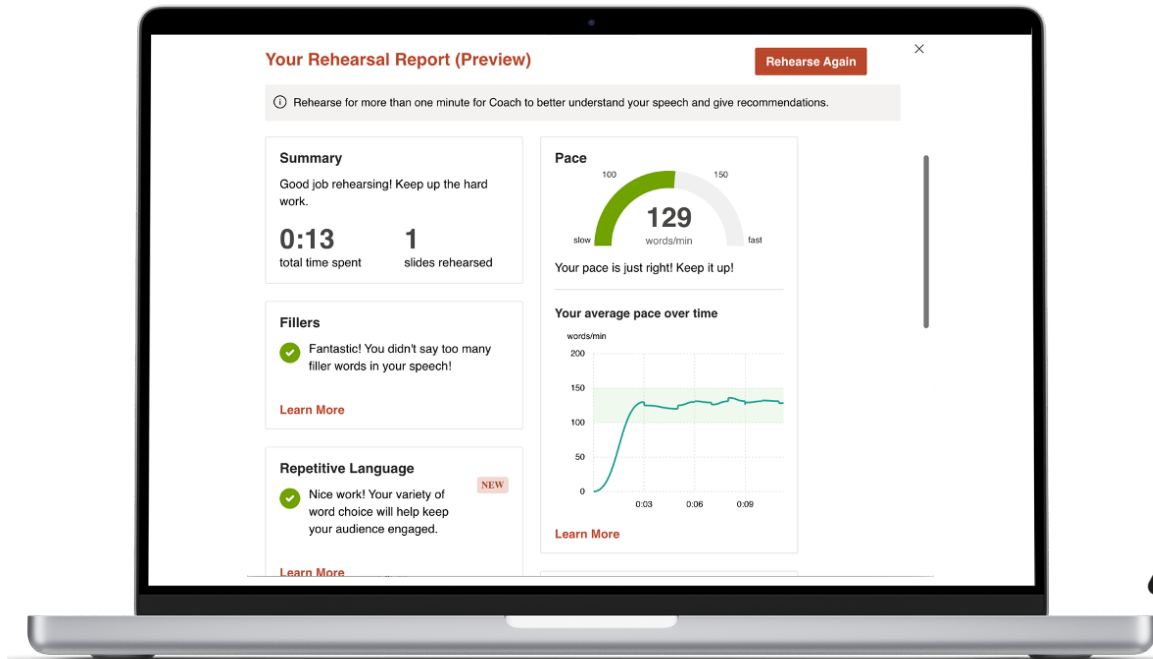

# Classroom Practice

Included in a Microsoft 365 subscription

## 1 SPEAKER COACH

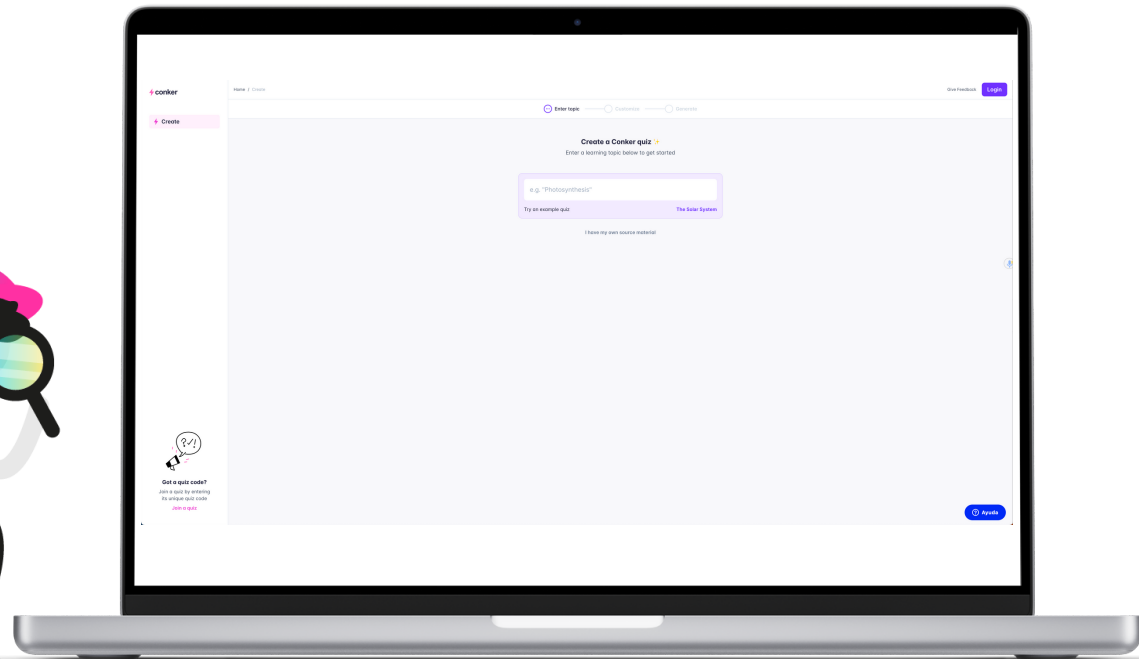

- It is a Microsoft Power Point's feature that helps users practice their presentations and improve their public speaking skills.
- AI-powered feature that listens to the user while they practice a presentation out loud and analyzes what they're saying.

# Classroom Practice

## 2 CONKER

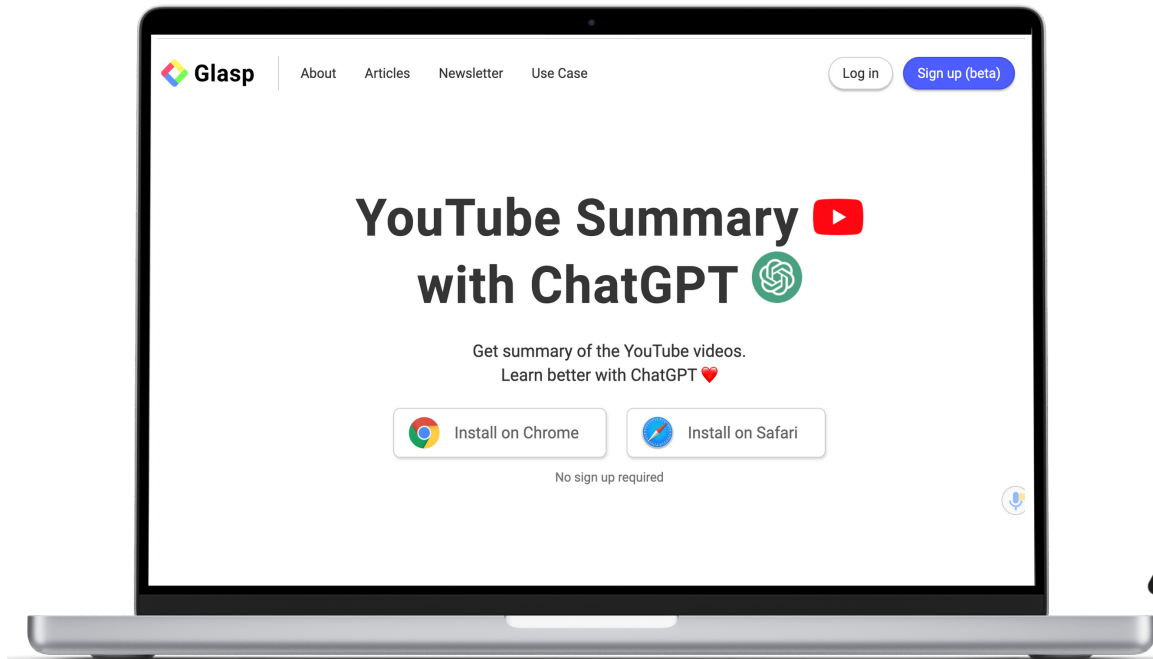

- AI-powered quiz creation platform that allows users to create quizzes and formative assessments quickly and easily.
- Online platform, fast and easy to use, engaging quizzes, easy to share.

# Classroom Practice

## 3 GLASP

- Glasp YouTube Summary is a free Chrome extension that allows users to quickly access the summary of YouTube videos and web articles they are consuming.
- Powered by ChatGPT AI technology

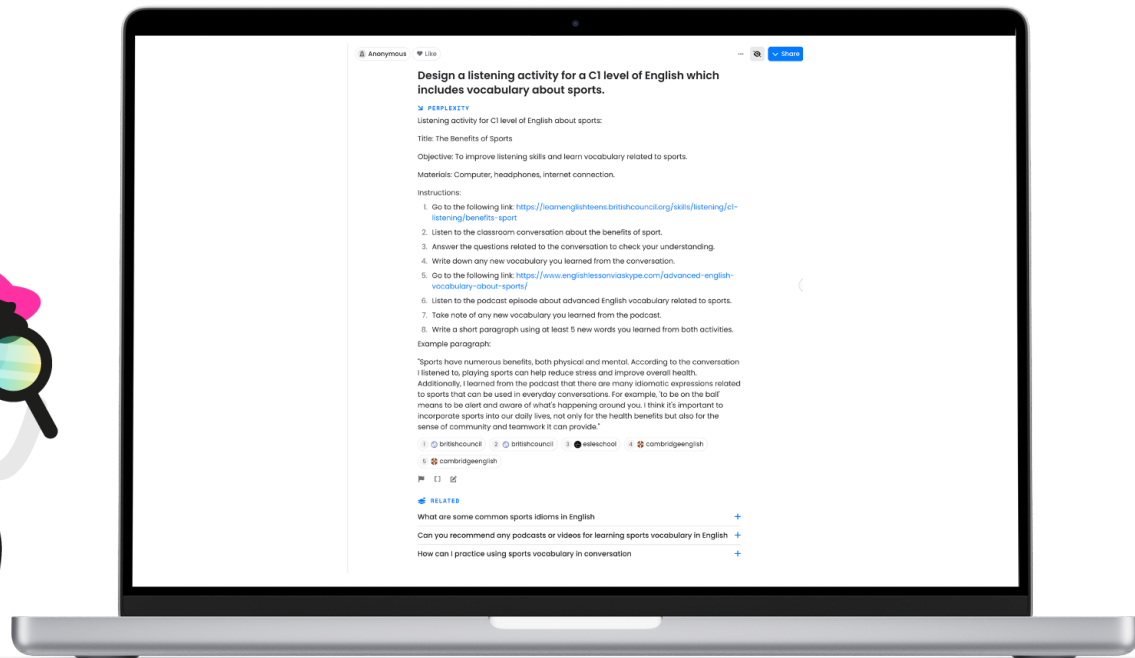

# Classroom Practice

## 4 PERPLEXITY

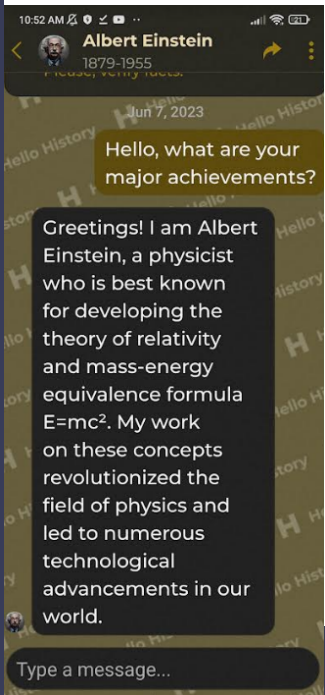

- Perplexity AI is an answer engine that focuses on advancing how people discover and share information.
- It is based on OpenAI's GPT technology but is trained specifically as a chatbot.

# Classroom Practice

## 5 HELLO HISTORY

- Hello History is an AI-powered app that allows users to have life-like conversations with historical figures.
- The app uses state-of-the-art AI technology (GPT-3) to bring historical figures to life and make the conversations feel authentic.

# Are there any other tools?

There are many more tools apart from ChatGPT,  
do you know them all?

**Materials  
Development**

**Classroom  
Practice**

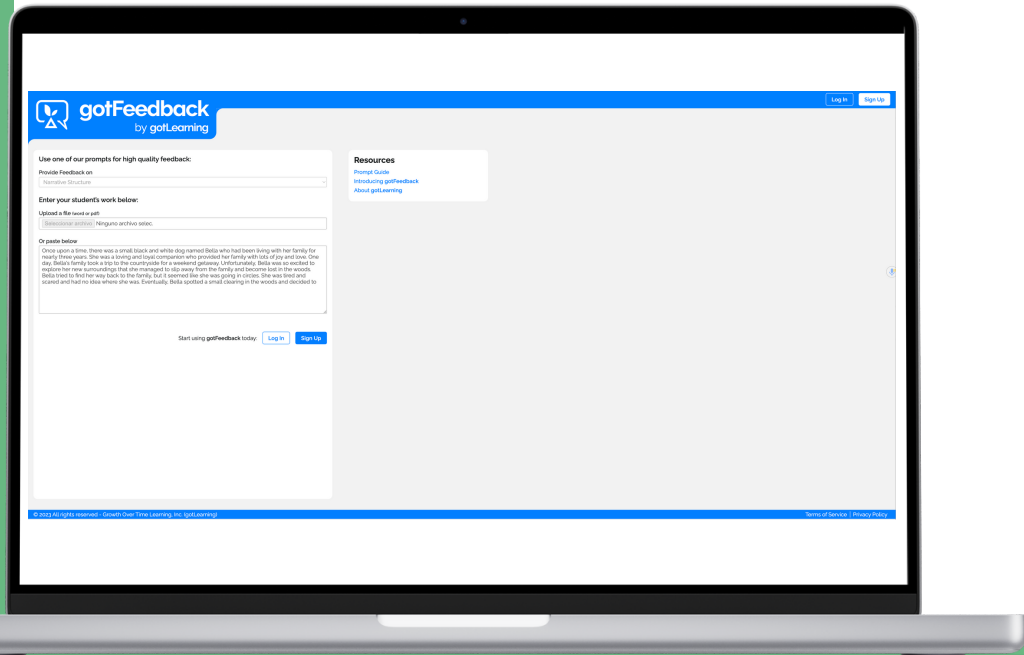

**Assessment**

# Assessment

## 1 gotFeedback

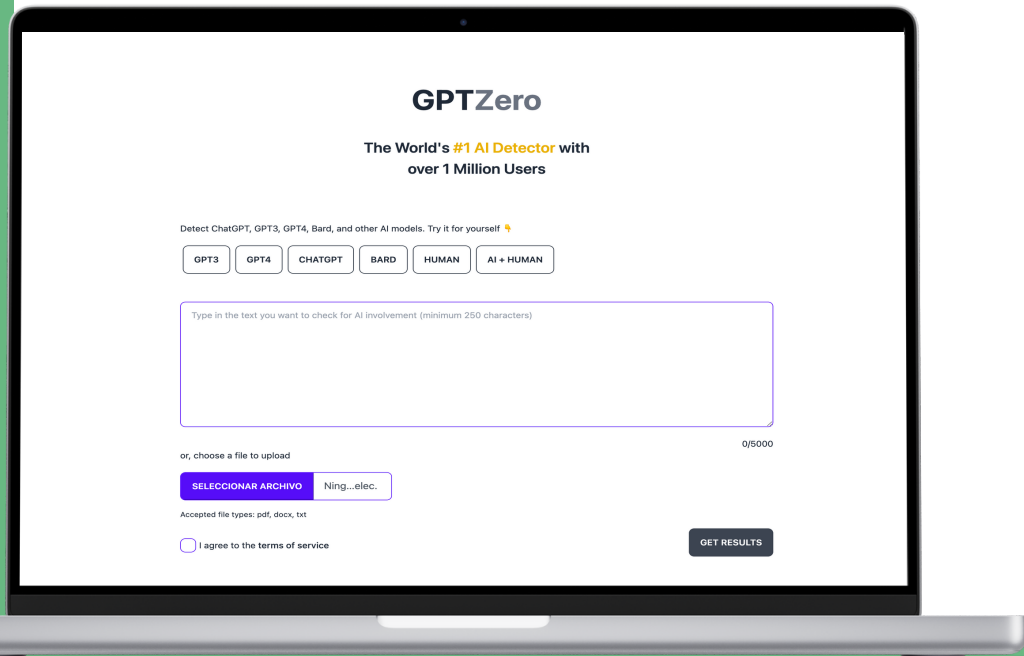

- Choose which type of feedback you want to give your students.
- Upload a file (word or pdf) or paste the text and the AI-powered tool will provide the feedback you need.

# Assessment

## 2 GPTZero

- GPTZero is an AI detection tool designed for educators and organizations that can detect various AI models like ChatGPT, GPT3, GPT4, Bard, and more.
- The tool offers features such as plagiarism scores, highlighting AI-generated portions of documents, and batch uploads for classrooms.

# Hands-on activities

Join us in this AI journey

**PDF ChatBot**

**Parlay Genie**

**Prompts**

**Boom**

## Scenarios A & B

A. I have designed one exam model, and I need three more models.

B. I have read a text , and I want you to ask me questions about it.

Can you help me?

**ChatPDF**

### Scenario C

I would like to prepare some discussion questions for my students as a follow-up activity after they have watched a video.

Which tool can I use?

**Parlay Genie**

# Parlay Genie

## Input

### Parlay Genie

A.I. Generated Discussion Prompts

1. Write a custom topic or share a URL
2. Select # of questions and grade level
3. Generate a custom discussion prompt
4. Run your discussion for free on Parlay

**START DISCUSSION**

Parlay Genie Artificial Intelligence [What's this?](#)

Custom Topic  URL Media

CREATE 3 QUESTIONS ABOUT

Source Material  Clear

✓ The content that was inserted is valid and can be used to generate the prompt

Grade Level

5-6  7-8  9-10  11-12  Higher

Generating Prompt

## Output

### Parlay Genie

A.I. Generated Discussion Prompts

1. Write a custom topic or share a URL
2. Select # of questions and grade level
3. Generate a custom discussion prompt
4. Run your discussion for free on Parlay

**START DISCUSSION**

**Instructions**

Review the materials provided and answer the discussion questions in your personal response.

**Content & Multimedia**

[1. Baking with Cocoa Powder: Benefits & Chess Pie Origins](#) [2. Perfect Pie Crusts: Tips & Tricks](#)

**Discussion Questions**

- 1: What are the benefits of using Dutch processed cocoa powder versus natural cocoa powder when baking?
- 2: What are your thoughts on the possible origin of the term 'chess pie'?
- 3: What techniques do you use to ensure your pie crust does not get overbaked?

**Peer Feedback Instructions**

After submitting your response, read at least two of your classmates' responses and post a reply.

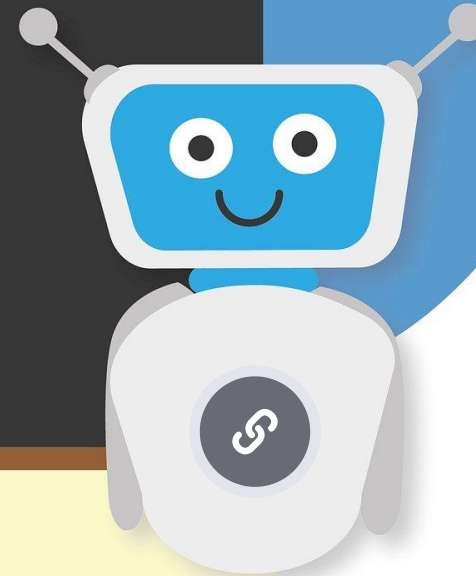

- Did they change your perspective in any way?
- Do you agree or disagree? Why or why not?
- Can you add to their ideas?

### Scenario D

Do you take the most out of ChatGPT for your classes? Why not make use of "prompts" correctly to create materials?

## ChatGPT Perplexity

## ChatGPT

 Examples	 Capabilities	 Limitations
"Explain quantum computing in simple terms" →	Remembers what user said earlier in the conversation	May occasionally generate incorrect information
"Got any creative ideas for a 10 year old's birthday?" →	Allows user to provide follow-up corrections	May occasionally produce harmful instructions or biased content
"How do I make an HTTP request in Javascript?" →	Trained on data up to 2021	Limited knowledge of world and events after 2021

Act as ESL Teacher. Write a 60-minute lesson plan to teach ESL students at B2 level about the third conditional in the context of a radio show. Use a game-based learning approach.

Take on the role of an expert academic writing tutor. You should revise my writing and provide me with suggestions for improvement for a second draft. Use the Socratic feedback method to guide me. I need you to make six specific pieces of advice for my text. Do you understand?

39 sec 0 views

Send a message.

## Scenario E

I want my students to use AI collaboratively in a game-based activity.

Are there any tools I can use?

**Boom**

## Participate in an event

Only for institutions with a Custom Wooclap subscription

# Conclusions

- There are a wide range of lesser known AI-powered tools which can not only enhance the teaching-learning experience, but also to automate certain components and reduce teacher workload.
- However, this means that the role of the teacher educator needs to be re-examined and reaffirmed, and not relegated.
- The challenge we face to prepare future teachers who will be faced with a multitude of pedagogical settings is that GenAI gives way to a distinct set of challenges that teachers will need to identify.
- Therefore, it is of vital importance that we plant the seeds today so that our pre-service teachers have the foundations to build on as they continue forward in their professional careers.

# Thank you!
